Valente

People mover

Mercedes-Benz

Vans. Born to run.
The Valente.

The family mover that’s big on comfort and style.

When it comes to moving the family and all that goes with it, the Mercedes-Benz Valente is built for just that. With dual sliding doors, eight full-sized seats, space for all the essentials and packed with safety features, the Valente is just what the growing family needs. Add to that a powerful state-of-the-art engine and unique BlueEFFICIENCY technology, Mercedes-Benz has raised the benchmark for large-capacity vehicles to a whole new level.

The sleek Valente has stepped up in the style stakes and strikes quite the pose with 17” alloy wheels, rear tinted windows and day-time running lights all featured as standard. This people mover is perfectly practical, but its dynamic design is leading the way.
Room to move.

The flexible seating advantage.

There’s plenty of room to move in the Mercedes-Benz Valente. With more than ample space to seat eight people in comfort, the fully flexible seating options can be configured to fit your needs whenever you wish. Seats can be safely rotated to face in almost any direction, opening up the possibility of a cosy face-to-face seating position. You can also adjust the backrest angle of the seats, so passengers can really relax and there’s even a space between the two front seats giving you unrivalled access from front to back.

With so much room you’ll be pleasantly surprised to know that there is also plenty of room for luggage. The 730 litre luggage space means there will be no need to pack lightly anymore for those family holidays. With its rare combination of spacious seating and generous luggage capacity, the Valente offers unparalleled practicality.
The perfect combination.
Safety and comfort that puts you in the right space.

The Valente has all the ingredients for the perfect family car. Combine the meticulous Mercedes-Benz safety standards with innovative design, ride comfort and driving enjoyment and you get a car that firmly puts you in the right space. The Valente is packed with the safety features you’ve come to expect from a Mercedes-Benz, including ABS brakes, Electronic Stability Control, passenger airbags and adaptive brake lights, but they haven’t stopped there.

The unique Mercedes-Benz ADAPTIVE ESP® system has the ability to detect in an emergency the weight distribution of all passengers at any given time and compensate accordingly. The Valente is also packed with technology to make time spent in the car more enjoyable, including parking sensors, automatic rain/light sensors along with iPod® and Bluetooth® connectivity. There is also a family friendly space that features built in child restraints, dual sliding doors for easy access no matter where you’re parked and dual zone climate control.

Power to the people.
The Valente engine goes from strength to strength.

When you have a people mover filled with a large family or even a sports team, you need power. The Valente has that and more. Powered by a 2.2L 4-cylinder CDI engine producing 120kW and 360Nm, and with the added benefit of twin turbo flexibility, the Valente delivers peak torque from as low as 1,600rpm through to 2,400rpm. This will ensure that the Valente will have no trouble with eight adults and luggage.

For Mercedes-Benz, responsibly shaping the long-term future of mobility is both an aspiration and a duty. The way forward is called BlueEFFICIENCY – a package of intelligently combined, innovative technologies that help to significantly cut fuel consumption and pollutant emissions. In the Valente 4-cylinder model you are now able to experience the benefits of this for yourself – without having to compromise on safety, comfort or driving pleasure.

The standard BlueEFFICIENCY package includes:

- 8.2L/100km and 216g of CO₂/km performance
- ECO power steering pump, internal engine measures, battery management, regulated fuel pump and lower rolling resistance tyres

For maximum passenger comfort, a 5-speed automatic transmission that provides seamless gear changes. BlueEFFICIENCY technology helps to significantly cut fuel consumption and pollutant emissions.
Standard features.

**Multifunction leather steering wheel**
The multifunction leather steering wheel can control the audio system without having to take your hands off the steering wheel.

**THERMOTRONIC climate control**
The THERMOTRONIC automatic climate control system allows the driver and front passenger to adapt the climate in their respective seats to suit their individual requirements.

**Cruise control with SPEEDTRONIC**
Cruise control allows the driver to set a desired cruising speed. SPEEDTRONIC helps to assist the driver in adhering to speed limits by setting a maximum speed.

**PARKTRONIC**
A highly advanced system that helps make parking even easier. Visual and audio warnings are provided upon detection of obstacles at the front and rear of the vehicle.

**Seating for eight adults**
The fully flexible seating options seat eight people in comfort. Seats can be safely rotated to face in almost any direction, opening up the possibility of a cozy face-to-face seating position.

**730 litres of boot space**
The 730 litres of boot space allows for plenty of room for luggage.

**Sunroof**
Front and rear sunroof provides ample natural light.

**COMAND APS**
Our innovative multimedia system combines contemporary in-vehicle hi-fi technology with an intelligent hard-drive based navigation system. The 17.7cm colour screen with high resolution map depiction and dynamic route guidance takes into account congestion information provided via TMC to ensure optimum driver performance. Up to 4GB memory offers space for your favourite music in MP3 format, and of course COMAND APS also plays audio or video DVDs. COMAND APS can be operated via the multifunction steering wheel. Available with DVD changer as an option.

Optional features.

**Bi-Xenons**
Bi-Xenon headlights with LED day-time driving lights (includes headlight cleaning system).

**Reversing camera as part of COMAND APS**
As part of COMAND APS, the integrated reversing camera gives added visibility and safety.

**Dual electric sliding doors (RHS and LHS)**
Automatic, quiet opening/closing of the sliding passenger compartment doors without jolting or jarring.

Interface kit: B6 782 4559  
Holder: B6 782 4501  
Connects your iPod® to your vehicle’s audio system. It’s easy to control your iPod® using the buttons on the multifunction steering wheel. The iPod® is connected in the glove compartment, where it is hidden from prying eyes. Its battery is also charged while connected. The flock-lined iPod®/iPhone® holder is designed to protect your valuable device and prevents it from sliding around.

Luggage net  
B66560594  
The robust net prevents contents from falling out of the load compartment, even when the tailgate is opened quickly. Items can also be stored in handy mesh pockets.

Rear mounted bicycle rack  
B66560545*  
Designed to be fitted to the tailgate. Holds 2 bicycles. Tailgate can still be opened with the rack in place. Includes statutory repeater lights. Rear power supply required.

Servicing and repairs.

We’re with you all the way.

Choosing the best people mover is an excellent start, but it’s just the beginning. Making sure that your Mercedes-Benz people mover is working at the optimum level is critical. A Mercedes-Benz authorised workshop is staffed and equipped for excellence and will assist to keep your people mover operating as intended. Mercedes-Benz technicians complete training and retraining every year to ensure they are up-to-date with technology. Genuine Parts are available at every Mercedes-Benz workshop. Every Genuine Part has been tested to exacting standards for maximum reliability supported by a two year, and unlimited kilometre, warranty.

Warranty.

Our comprehensive Mercedes-Benz Vans Warranty means peace of mind for three years or until the vehicle has travelled up to 200,000km, for new Mercedes-Benz Motorhomes purchased from authorised Mercedes-Benz dealers in Australia. You’re covered for parts and labour charges incurred in rectifying a manufacturing defect relating to materials or workmanship.

Roadside Assist.

In the unlikely event of needing assistance, all you have to do is call. Mercedes-Benz Van Road Care is designed to provide you with assistance in case of a breakdown anywhere in Australia – 24 hours a day, 365 days a year. Standard cover comes at no extra cost on a wide range of vehicles* during the manufacturer warranty period and can be upgraded depending on your needs.

Safeguard.

Safeguard is a service program designed to protect your vehicle from unexpected operating costs. Through Safeguard, the Mercedes-Benz authorised dealer network carries out maintenance and repairs according to an agreed schedule and pre-determined costs.

Benefits include:

• Scheduled Servicing – A planned service and mechanical repair schedule
• Operational Reliability – Reduce the risk of vehicle downtime through regular scheduled servicing and repairs
• Nationwide Service – Programme is supported by a comprehensive network
• 24-Hour Emergency Contact – Vehicle support anytime, anywhere in Australia
• Available for up to five years – The program can be amended to reflect changes in the operation of your vehicle.
• Great Rates – Preferential rates on genuine parts and labour
• Flexibility – Choose from three levels of cover designed to suit your individual needs

You’re covered.

On the road and off.

Warranty.

Our comprehensive Mercedes-Benz Vans Warranty means peace of mind for three years or until the vehicle has travelled up to 200,000km, for new Mercedes-Benz Motorhomes purchased from authorised Mercedes-Benz dealers in Australia. You’re covered for parts and labour charges incurred in rectifying a manufacturing defect relating to materials or workmanship.

Service programmes.

Putting you in control.

*Please note, some vehicles are excluded from the Road Care program, please see the Road Care brochure for full terms and conditions. Upgrades to the standard Road Care package are available at additional cost.

1615
ADAPTIVE ESP® Electronic Stability Program
ADAPTIVE ESP® is an innovative dynamic handling control system, which for the first time also takes the vehicle load into account. It actively intervenes in certain hazardous driving situations, e.g. if there is an imminent risk of skidding, by applying a braking force to one or more wheels and adjusting the engine output as required so as to help the driver deal with the hazardous situation. As well as aiding directional stability, ADAPTIVE ESP® combines the functions of the anti-lock braking system (ABS), acceleration skid control (ASR), electronic brake force distribution (EBD), Brake Assist (BAS) and the optional Start-off Assist system. The ESP® Trailer Stability Assist furthermore enhances driving safety when towing a trailer.

Note:
ADAPTIVE ESP® can only act within the limits of the laws of physics. As a result, it cannot prevent skidding caused by aquaplaning, for example. If the driver exceeds these limits, even ADAPTIVE ESP® will not be able to prevent an accident.

Brake Assist (BAS)
In tests carried out in the driving simulator, our research engineers established that drivers do not apply the brakes vigorously enough during emergency braking. This finding led them to develop the Brake Assist system. From the speed at which the brake pedal is depressed, Brake Assist is able to detect a situation, which calls for emergency braking. In such cases, the system automatically increases the brake pressure, aided by the anti-lock braking system (ABS), which prevents the wheels from locking.

Start-off Assist
Start-off Assist, which is integrated into the ESP® system and comes as standard on automatic models, allows hill starts to be performed with ease. After the brake pedal is released, the brake pressure is maintained for approximately two seconds, allowing the driver to move their foot from the brake pedal to the accelerator without having to worry about the vehicle starting to roll. Start-off Assist is activated on uphill slopes of approx. 4% or steeper. It is not activated when starting off on the flat or on a downhill slope.

Acceleration skid control (ASR)
At the first signs of wheel slip, that is to say if the rotational speed of one of the driven wheels suddenly increases, ASR reduces the engine power and also intervenes in the brake system to prevent prolonged wheel spin. ASR ensures smooth start-off and acceleration, without prolonged wheel spin or sideways drift. The result is improved traction and safety – particularly on split-friction or slippery surfaces.

ESP® Trailer Stability Assist
This system complements ADAPTIVE ESP® and improves driving safety when towing a trailer by strategically applying the wheel brakes on the towing vehicle and reducing the enginetorque if the trailer starts to sway from side to side, thereby helping the driver to stabilize the vehicle/trailer combination. Where the system intervenes several times in succession, the braking force is increased each time, resulting in a noticeable drop in road speed.

Adaptive brake lights
The adaptive brake lights enhance active safety as they give a clearer signal when the vehicle is braked in an emergency. This is achieved by all the brake lights starting to flash in the event of emergency braking at speeds above 50 km/h. The warning is provided initially in the form of a visual display in the centre of the instrument panel. When the distance to an obstacle falls below 35 cm, the audible warning is also activated, first intermittently and then as a continuous tone at a distance of about 20 cm.

PARKTRONIC
PARKTRONIC is a parking aid which assists the driver when parking or manoeuvring in confined spaces. Working on the same principle as sonar, the system automatically warns the driver of obstacles just in front of or behind the vehicle. The warning is provided initially in the form of a visual display in the centre of the instrument panel. When the distance to an obstacle lapses below 33 cm, the audible warning is also activated, first intermittently and then as a continuous tone at a distance of about 20 cm.

Diesel particulate filter
Particulate emissions per diesel car have been drastically lower in recent years. Nonetheless, the constantly increasing number of diesel vehicles means that total emissions are too high and need to be reduced further. The diesel particulate filter from Mercedes-Benz is a breath of fresh air in this respect. It removes more than 95% of the particulates from the exhaust gases. At the same time a continuous regeneration process prevents the filter from becoming choked – which means that no fuel additives are needed.

### Standard Equipment

- Dark tinted windows in rear cabin with "pop-out" function for ventilation
- Colour coded bumpers
- 17" alloy wheels with 225/55 R17 tyres
- Electrically adjustable & heated mirrors
- Dual sliding doors
- THERMOTRONIC - fully automatic dual zone climate control
- Multifunction steering wheel (audio and phone controls)
- Leather steering wheel
- Front power windows
- Remote central locking (programmable for individual settings)
- Front power windows
- Audio 20 sound system with 5-inch TFT colour display and telephone keypad
- 6 CD changer/player with AM/FM tuner and MP3/WMA compatibility
- AUX interface
- Bluetooth® handsfree system
- Highline pixel matrix display
- 3 x 12V power sockets distributed throughout the vehicle
- Full luxury headlining
- Carpet flooring
- Driver authorisation system with engine immobiliser
- Lockable glovebox
- Two storage trays and cupholder on dashboard
- Auto dimming rear view mirror
- Light and rain sensor
- Park brake warning buzzer
- Tinted rear windows
- Front and rear storage compartments
- Illuminated vanity mirror
- Dashboard mounted gearshift lever
- Illuminated exit
- Interior panelling
- Outside temperature gauge
- Lumbar support (front seats)
- Ruffled backrest pockets
- Comfort driver and front passenger with adjustment capabilities, including lumbar support
- Luxury head restraints on Comfort driver and front passenger seats
- Quick release system allowing rear seats to be removed
- Two luxury 3 seat benches in rear
- Bench seats with folding capability
- Overhead reading lamps
- Warm/cool air ducts to rear
- Black tinted windows after B-pillar

### Safety Features

- 4 seats with child anchor point tethers and ISOFIX anchor points
- 5 Star ANCAP safety rating
- Adaptive electronic stability program (ESP®) with ABS, ASR, BAS, RCM, LAC, RM, EUC
- Driver and front passenger dual airbags
- Three airbags
- Window airbags
- Four wheel disc brakes
- Height adjustable head restraints
- 3-point inertia reel seat belts with pre-tensioners (front only)
- Height adjustable front seat belts
- Front and rear brake pad wear indicators
- Height and reach adjustable steering column
- Rear centre stop light
- Adaptive brake light
- Headlight beam range control
- Headlight beam range control
- Child safety locks
- Seat belt warning signal
- Illuminated exits

### Optional Equipment

- Replace with Dual electric sliding doors (RHS and LHS)
- Metallic and non-metallic paint
- Vehicle alarm system
- Bi-Xenon headlights, LED daytime driving lights (Includes headlight cleaning system)
- Child safety locks
- Seat belt warning signal
- Command APS (Satellite Navigation with Reversing Camera)
